

TECHNICAL DATASHEET

High-temperature drum heater up to 200 °C for 25 to 220 l

Item no. DD-KHLM-11-9870

The high-temperature drum heater reaches up to 200 °C and liquefies media that are solid at low temperatures – such as waxes, bitumen, greases, paraffin or hot-melt resins. The jacket of silicone-coated glass fabric is heat-resistant and robust.

Features

- Silicone-coated glass fabric, 6 mm fibreglass insulation
- Digital controller 0-200 °C (0-150 °C version with 1,500 W) with timer and soft start
- Buckle fastening, can be combined with insulated lid and drum base heater
- Internal thermal fuse, protection class II

Typical applications

- Liquefying waxes, paraffin, bitumen and greases
- Bringing hot-melt resins and adhesives to processing temperature
- Chemical, cosmetics and candle industries
